AUTHORIZATION

EU Residence Permit
Hungary · Open to hybrid/on-site
in Budapest & remote in Europe

EDUCATION

MBA · Business Admin
Budapest Metropolitan Univ.
2024 – 2026 (expected)
Thesis: Ethical AI for
Sustainable Supply Chains

BSc · Computer Engineering
Islamic Azad University, Iran
2015 – 2020

TECHNICAL SKILLS

Frontend

React 18 · TypeScript · Vite
Tailwind CSS · Radix UI · Framer
Motion
Recoil · React Flow · Three.js
Recharts · Heroicons · Lucide

Backend & DB

Node.js · Express · REST APIs
MongoDB + Mongoose · Redis · SQL
JWT · bcryptjs · Helmet

Tech & Business Analyst

Product-Oriented Full-Stack Developer

CAREER SUMMARY

Tech & Business Analyst with 5+ years across full-stack development, startup founding, and retail digital transformation. Built and launched two commercial platforms from scratch — leading cross-functional teams and owning the full product lifecycle. MBA candidate (2026) researching Ethical AI for Sustainable Supply Chains; developed an AI-driven ESG supplier scoring model achieving $r \approx 0.81$ correlation with expert evaluations. Seeking roles in business analysis, digital transformation, or technology consulting where technical depth and strategic thinking create measurable impact.

WORK EXPERIENCE

Founder & Lead Developer · NomadSpot

April 2025 – Present | Budapest, Hungary

Early-stage marketplace connecting remote workers with co-living and co-working spaces across Europe (beta).

- ▶ **~35% faster load time** — Architected full platform (React, Node.js, MongoDB) with lazy loading and API caching
- ▶ **Product roadmap** — Prioritized features through 20+ user interviews, shaping 3 major product iterations
- ▶ **Team lead** — Managing 3-person dev team across sprint planning and CI/CD pipelines via GitHub Actions
- ▶ **~40% onboarding improvement** — Redesigned user flow based on session analytics, cutting time-to-first-booking significantly

Co-Founder & Technical Lead · Shoppermo

Jun 2020 – Jan 2024 | Tehran, Iran → Budapest

B2C e-commerce platform for fashion retail — scaled to 5,000+ registered users.

- ▶ **300+ daily transactions** — Led end-to-end platform development; designed RESTful API architecture at peak load
- ▶ **~45% faster response time** — Backend optimization via query refactoring and Redis caching
- ▶ **Payment integrations** — Integrated 3 third-party payment gateways with full regulatory compliance
- ▶ **Product-market fit in 8 months** — Collaborated with 6-person cross-functional team (design, marketing, logistics)

Strategic & Digital Manager · Arash Mall & Arash Market

May 2019 – May 2023 | Gilan, Iran

Led digital transformation for a family-owned retail chain — 50+ staff across two locations.

- ▶ **~30% fewer inventory errors** — Digitalized inventory management, saving ~8 hrs/week in manual reporting
- ▶ **Response time** — Implemented internal communication platform, cutting response time from hours to 15 min
- ▶ **4 projects delivered on time** — Managed simultaneous operational improvement rollouts under budget
- ▶ **~20% efficiency gain** — Aligned technology roadmap with business growth strategy over 2 years

FEATURED PROJECT — OPTISUPPLY

AI-Based ESG Supplier Evaluation System · MBA Thesis, Budapest Metropolitan University

ML & Data

ml-kmeans · ml-pca · ml-matrix
Pandas · scikit-learn · NumPy
XAI · ESG scoring models

DevOps & Tools

Docker · docker-compose
GitHub Actions · Jest + Supertest
ESLint · nodemon · JIRA · Figma

BA & PM

Requirements gathering
Process mapping · Roadmapping
Digital transformation

Methodologies

Agile/Scrum · Design Thinking
Lean Startup · DSR

LANGUAGES

github.com/ne3mer/OptiSupply

Transparent, explainable AI model for evaluating suppliers across ESG criteria. Full-stack app with ML backend and interactive 3D dashboard.

Stack: React 18 + TypeScript + Vite · Tailwind CSS · Radix UI · Framer Motion · Recoil · React Flow · Three.js / @react-three/fiber · Recharts

Node.js + Express · MongoDB + Mongoose · JWT + bcryptjs + Helmet · ml-kmeans + ml-pca (ML scoring) · Docker + docker-compose · Jest + Supertest

- ▶ **r ≈ 0.81 Pearson correlation** — Strong real-world validity — demonstrated via Design Science Research (3 iteration cycles)
- ▶ **XAI principles** — Built for explainability so non-technical decision-makers can audit and trust outputs
- ▶ **Multi-criteria scoring** — Weighted ESG indicators derived from literature review and expert interviews

BUSINESS ANALYSIS HIGHLIGHTS

- ▶ Requirements gathering & stakeholder interviews — 20+ user interviews across two platform builds
- ▶ Process mapping & digital transformation — digitalized operations for 50+ staff retail chain
- ▶ Product roadmapping & feature prioritization — shaped 3 major product iterations at NomadSpot
- ▶ Cross-functional team leadership — coordinated design, dev, marketing, and logistics teams
- ▶ Data-driven decision making — all project decisions backed by metrics and session analytics
